PROJECTS

URLShortner - A Fast & Reliable Link Management Service May 2025 – June 2025

- Developed a scalable URL-shortening platform to make long URLs easier to manage, including custom short links, analytics tracking, and redirect management.
- Implemented the front-end using ReactJs for a clean and responsive UI, and built the backend with NodeJS to handle link generation and redirection.
- Integrated MongoDB to store URLs efficiently and created RESTful APIs for smooth communication between the user interface and the database.
- **Tech:** HTML, CSS, JavaScript, ReactJs, MongoDB, NodeJS

UnityEats – An NGO Official Website Jan 2024 – Feb 2024

- Created an NGO official website featuring a smooth and secure donation system using ReactJs for the front-end.
- Built RESTful APIs to ensure seamless communication between the platform and the database, resulting in fast and reliable user experience.
- Used NodeJS on the backend with MongoDB as the database to handle donor information and transaction records.
- **Tech:** HTML, CSS, JavaScript, ReactJs, MongoDB, NodeJS

Discord Ticketing System – Automated Support & Management Bot March 2023 – April 2023

- Engineered an automated ticketing system for discord servers to streamline support, moderation workflows, and user queries.
- Structured the system with NodeJS and Discord.js, enabling features such as ticket creation, category-based routing, transcript generation, and role-based access control.
- Organized data handling through MongoDB for managing ticket logs, user details, and server configurations, ensuring consistent and reliable operation.
- **Tech:** JavaScript, NodeJS, Discord.js, MongoDB
